About DMT

DMT Consulting Ltd (UK) is a leading international mining consultancy. The company is part of DMT's consulting group which consists of seven operating companies, strategically located around the globe. The group has a long history of assisting the mining industry worldwide.

DMT provides a broad spectrum of multi-disciplinary consulting and engineering services for mining projects at all stages of development. This extends from exploration, resource and reserve evaluation through scoping, prefeasibility and feasibility studies, financing, permitting, construction and throughout the mine's operating life to eventual closure and rehabilitation.

The Group also specialises in providing independent technical assessments, including due diligence, review/audit, risk assessment and quality assurance. These services include providing technical assurance to lenders and investors; support for IPO and stock exchange listings, takeovers, mergers and divestments, and acting as expert witnesses for legal proceedings. In addition, DMT undertakes optimisation studies, training, project management and construction supervision including acting as Owner's or Independent Lender's Engineer.

Our Clients include mining companies of all sizes, banks and other financial institutions, exploration and development companies, law firms, government bodies, aid agencies and investors.

DMT's experience covers virtually the entire spectrum of mined commodities and, through its network of offices, DMT staff have gained experience in working all over the world.

DMT is a subsidiary of TÜV Nord.
